BSc (Hons) Ophthalmic Dispensing

Subject Area	Ophthalmics, Science
Course Type	Higher Education
Study Level	Level 6
Delivery Mode	Full-time
Duration	3 Academic Years
Start Date	September 2025
Course Code	PFUB045

Course Summary

The full-time Bachelor of Science Degree in Ophthalmic Dispensing is aimed at those who wish to work towards becoming a fully qualified and registered Dispensing Optician whilst achieving a Level 6 qualification. The BSc (Hons) in Ophthalmic Dispensing will provide you with the skills to achieve Fellowship of the Association of British Dispensing Opticians and become a General Optical Council Registered Dispensing Optician.

During this course you will study up to Level 6 and receive a BSc (Hons) in Ophthalmic Dispensing on successful completion. In addition to your Bachelor's degree, successful completion of your final qualifying exams, with the Association of British Dispensing Opticians, will allow you to use the suffix FBDO (Fellow of the Association of British Dispensing Opticians).

Successful completion of this programme and the practical PQE and FQE examinations will lead to the award of the General Optical Council (GOC) approved ABDO Level 6 Diploma in Ophthalmic Dispensing. The suffix 'FBDO' may then be used and an application for entry onto the GOC Register as a Dispensing Optician may be made.

What You Will Learn

The course benefits from almost 80 years of combined academic experience of the staff team. All staff on the Ophthalmic Dispensing programme team are qualified Dispensing Opticians. In addition to this, members of the Ophthalmic Dispensing programme team are employed as ABDO external examiners of both theory and practical examinations and this experience of working with the Professional Body is reflected in the currency of the programme.

Speakers from ABDO and the GOC visit the College annually to provide the students with information about registration and membership. You will need to register with both the GOC and ABDO as a student registrant during the period of your study.

Teaching and learning methods include:

- Small group discussions
- Seminars, tutorials and practical sessions
- Group work
- Self-directed learning
- Independent and group projects
- Lectures
- VLE based exercises
- Presentations
- Workshops

Modules

Year 1:

- Theory of General Optics
- Practitioner Development
- Patient Centred Care
- Theory of Ophthalmic Lenses
- Ophthalmic Dispensing Practice
- Ocular Anatomy
- Prescription Analysis

Year 2:

- Clinical Patient Management
- Standards of Practice

- Management and Leadership
- Ocular Pathology
- Theory of Ophthalmic and Contemporary Dispensing
- Assessment of Refractive Errors
- Advanced Theory of Ophthalmic Lenses

Year 3:

- The Assessment and Management of Refractive Errors
- The Assessment and Management of Visual Impairment and Principles of Contact Lens Wear
- Research Project
- General Optical Council Outcomes
- Advanced Ophthalmic Dispensing Practice
- Ophthalmic Business and Retail

Entry Requirements

- All applicants must be working in an ophthalmic practice and have a GOCregistered supervisor prior to enrolment. This is a requirement of ABDO's 'Guidance for Trainees'.
- Typically 64 UCAS points: Two A levels at grade 4 or C or above to include one science subject (Physics, Biology, Chemistry or Mathematics) or equivalent qualification.
- Or 80 UCAS tariff points from a BTEC Extended Diploma the equivalent of MMP.
- Or 96 UCAS tariff points from an appropriate T-Level the equivalent of a pass (A*-C).
- Five GCSEs including Mathematics, English and Science at Grade C/4-5 or above.

Applications from candidates who do not fully meet these criteria but have experience in the subject area are welcomed. These applicants will follow the Bradford College Recognition of Prior Learning (RPL) and Recognition of Prior Experiential Learning (RPEL) policy/procedure.

Applications from GOC registrants who have completed their programme of study and wish to progress onto the BSc degree are welcome. Such progression would be considered in line with the College RPL/RPEL policy which is based on the University's regulations and policy. Each RPL/RPEL application will be reviewed on a case-by-case basis.

Additional criteria: Students must apply for an enhanced DBS certificate prior to attending the course.

Work Experience

Bradford College has excellent links with industry and students on the BSc (Hons) in Ophthalmic Dispensing will benefit from visiting lecturers on a regular basis. These include:

- Hoya UK Ltd Ophthalmic Lens Manufacturer
- Stepper UK Ltd Spectacle Manufacturer
- Coral Eyewear Spectacle Manufacturer
- Rodenstock Ophthalmic Lens Manufacturer
- Alcon Contact Lens manufacturer

As part of their studies, students will be offered the opportunity to visit an optical manufacturer to complete Case Record 51 – a compulsory part of their pre-registration period. This is organised by the College where students gain valuable experience in all aspects of lens manufacture and glazing.

Progression

Successful completion of the course means that you will be in a position to progress to:

- The role of a Dispensing Optician in a private practice, in the NHS or in a large multiple organisation
- A management position in an organisation
- Employment with lens and frame manufacturers
- Enhanced skills by studying the Contact Lens Certificate at Bradford College to train to become a Contact Lens Optician
- Enhanced skills by studying the Low Vision Honours course at Bradford College to train to become a Low Vision specialist

Many of our previous students have become:

- Practice Owners / Practice Directors
- Practice Managers,
- Account Managers
- Specialists in the field of Contact Lens fitting and Low Vision.

The BSc (Hons) in Ophthalmic Dispensing offers students the potential opportunity to go on to study Optometry.
