Course Summary

If you are progressing from our Level 1 motor vehicle course or already have industry experience, then this may be the course for you.

And now is the perfect time to gear up with the right qualifications that meet the industry's evolving demands. Our Level 2 diploma in Vehicle Maintenance and Repair (Light Vehicles) is designed to turbocharge your knowledge and skills, building on the foundation laid at Level 1.

What You Will Learn

This Level 2 Diploma in Light Vehicle Maintenance and Repair Principles is your gateway to mastering the art of vehicle care. You'll dive into the essentials of health and safety in the automotive environment, learn to support various job roles, and get hands-on with materials, tools, and measuring devices.

Imagine yourself confidently performing routine light vehicle maintenance, expertly

removing and replacing engine and electrical units, and delivering top-notch customer service. This course is designed to ignite your passion for the automotive industry and equip you with the skills needed to drive your career forward.

Modules

Core modules:

- Light vehicle maintenance
- Engine, lubrication and cooling
- Light vehicle electrical systems
- Light vehicle chassis systems
- Light vehicle transmissions and drivelines
- Light vehicle fuel, ignition and exhaust systems

Entry Requirements

You will need to have successfully completed a Level 1 Motor Vehicle qualification or have relevant industry experience.

Progression

A Level 2 qualification can lead onto several exciting progression opportunities. Such as advancement onto the Level 3 Diploma in Light Vehicle Maintenance & Repair Principles, which delves deeper into the technical aspects of vehicle maintenance and repair.

Additionally, you can can pursue an automotive apprenticeship, gaining hands-on experience while earning a qualification. For those interested in expanding their expertise, there are also specialised courses in areas like hybrid and electric vehicle maintenance. These pathways open doors to various roles in the automotive industry, from technician positions to more advanced technical and supervisory roles.
