# Programme Title: BA (Hons) Social Work

Awarding Institution:	University of Boltor	า									
Teaching Institution:	Bradford College										
Department and/or School/Curriculum Area:		are and Community Practice									
Professional accreditation	Professional body Social Work England	Professional body URL https://socialworkengland. org.uk/	Status of graduates Qualified as social worker with entitlement to register with professional body.								
Final award(s):	BA (Hons) Social V Bachelor of Arts - E										
Exit or Fall-back award(s)	<ul> <li>working towards the achieve the minimula award shall be record (intermediate) awards</li> <li>a student who practice requires Social Studies overall, includin at Level 5 and will be an ordinate a student is elige in Social Student 120 credits at Level 5 and unclassified awards a student is elige Education in Social Student is elige E</li></ul>	le for an intermediate award eir target award. Students w um performance required for ommended for the conferment rd they have achieved - does not meet the full acade ements at Level 6 is eligible for a fi s/he achieves at least 300 ng 120 credits at Level 4 and a minimum of 60 credits at L hary degree and an unclassif gible for a <b>Diploma of Highe</b> <b>lies</b> if they achieve 240 credit Level 4 and 120 credits at Level 4 60 credits at Level 6). This w vard. gible for a <b>Certificate of Hig</b> <b>Social Studies</b> if they succe credits at Level 4 but do not p do not complete the acader ements for achievement of 1 will be an unclassified award.	ho do not the target nt of a lower mic and for a <b>BA</b> 0 credits 120 credits evel 6. This ied award. <b>F Education</b> ts (including vel 5) but do ieve at least k, 120 credits vill be an <b>her</b> ssfully proceed with nic and								

	In these cases, the student is not qualified to practice Social Work.
Programme title(s)	Social Work
HECoS Code	100503
University Course Code(s)	PFUB048
QAA Benchmark Statement(s)	The following benchmark statements apply to this programme: QAA benchmark statement for Social Work (28 Nov 2019)
Other internal and external reference points	<ul> <li>The Professional Capabilities Framework hosted by British Association of Social Work (BASW)</li> <li>Social Work England - Standards of Proficiency</li> <li>Social Work England - Standards of Education and Training.</li> </ul>
Language of study	English
Mode of study and normal period of study	The BA (Hons) Social work is a 3 year programme delivered on a full-time basis.

#### Admissions criteria

The programme will recruit students who have the capability and suitability to develop the knowledge and skills necessary to meet the professional standards and become registered upon completion of the programme. The following admissions criteria apply but, in line with Social Work England's qualifying education and training standards, this BA (Hons) Social Work degree programme also welcomes applicants with experience of working or volunteering in social care fields.

- 120 UCAS tariff bearing entrance points or/equivalency. An overall Access course pass, to include a minimum of 18 points at merit level.
- GCSE pass at grade 4 or C in English or/equivalency.
- IELTS level 7 in English for International students who are 2<sup>nd</sup> language speakers. This is the Social Work England requirement.
- Satisfactory enhanced Disclosure and Barring Service check (DBS). Disclosures that are received by the College that record a conviction, reprimand or warning, are considered by the College's DBS panel. Applicants may be interviewed by the Team Leader or Head of Department, dependent upon the nature of the offence and the period of time that has elapsed. This serves to both determine the effect of this record on the College's ability to secure placement opportunities for the student, and on the student's future employment prospects.
- Prospective students are asked to prepare a reflective commentary about disclosures which are shared anonymously with key employers to assist decision making over suitability. If a conviction was deemed too serious or a concern for public safety, or would be seen to preclude the students from future employment or placement in the field then a decision would be taken as a programme team not to proceed with the offer.

- Students are required to declare whether they have had any social care involvement individually or as part of their family. If they have, students will be interviewed by the team leader regarding this to determine their readiness and the appropriateness to commence a social work programme.
- Satisfactory Health check to comply with fitness to practice standards (Social Work England). Students are required to complete a College health screening form at application as well as a disclosure form at interview. If the health issue is disclosed the student would be referred to Occupational Health and Learner Support Services. The OH team are familiar with the programme and its professional requirements and are able to make suitable decisions and recommendations about the students' welfare on the programme.
- Students are asked to declare if they have started a social work programme at any other institution. If so, students will be interviewed regarding this and the reason(s) for exiting the course. The institution concerned may be contacted in such cases.
- 100 hours relevant social care experience in employment or from direct personal experience.
- A reference of good character and conduct.
- Pass a writing task at interview.
- Pass a personal interview as part of admissions process.

## Additional criteria

None.

#### Additional admissions matters

- Students with a recognised learning difficulty in English, such as dyslexia, who do not fully
  meet the GCSE requirements above, may be considered for interview based on the
  discretion of the programme team.
- RPL/RPEL will be considered.

Fitness to practise declaration

Students on the programme will be subject to the College's Fitness to Practise policy and relevant Social Work England guidelines.

## Aims of the programme

The principal aims of the programme are to:

- Produce graduates who are eligible to apply for registration as a Social Worker with Social Work England.
- Produce social workers that put people and human rights at the heart of their practice.
- Prepare students to work as part of the social care workforce, working increasingly in integrated teams across and within specialist settings.
- Produce critically reflective qualified social workers, competent to practise effectively and who are committed to lifelong continuous learning as social work practitioners.
- Develop in students the flexibility and commitment to cope and adapt to change as well as to influence the programme of change in professional practice and service delivery.
- Produce social workers committed to and able to deliver, anti-oppressive and antidiscriminatory approaches to services.

 Enable students to develop the knowledge and skills embedded within the Professional Capabilities Frameworks.

## Distinctive features of the programme

The programme includes a large number of enrichment opportunities, such as guest lecturers who are national/international experts in their field, and people who use services.

The Adversity, Trauma and Resilience module introduces the theory and knowledge central to the role of a professional working in the field of trauma studies. It will draw on best practice in relation to implementing trauma-informed care and feeds into the Adverse Childhood Experiences (ACEs)/Adversity, Trauma and Resilience Strategy 2021-24 for the Bradford District.

The Risk Assessment and Professional Judgement module draws on knowledge from practice and research to assess adults' and children's needs enabling judgments to be made about welfare and risk which the team feels is a crucial part of social work practice in all fields.

Bradford College has a long and successful history in delivering professional social work qualifications. This degree has been developed in consultation with partner agencies, people who use services and students to embrace the Professional Capabilities Frameworks and support student success in the Assessed and Supported Year in Employment (ASYE).

The BA (Hons) Social Work degree has well developed partnerships with people who use services and who contribute significantly to the programme. During the admissions process, people who use services and tutors work together to interview candidates. These partnerships have also led to improved learning opportunities in the preparation of students' readiness to practice where people who use services and external partner agencies have provided innovative experiences acting as role players and drawing on personal testimonies to assess the quality of students' communication and interviewing skills. Throughout the curriculum, the staff team seeks to improve the relevance of teaching materials by using partnerships with service users and practitioners to increase their contribution to programme delivery and design.

#### Programme learning outcomes

## K. Knowledge and understanding

On completion of the programme, successful students will be able to demonstrate systematic knowledge and understanding of:

K1. The underlying concepts and principles of social work theory and practice, including diversity and inclusion.

K2. The law and statutory duties of social workers to promote, safeguard and protect people who use services and people who care for them.

K3. How to make effective and defensible, ethical assessments and decisions with people who use services.

K4. How to implement the trauma-informed approach to empower people who use services.

K5. The integration of models of risk assessment.

#### C. Cognitive, intellectual or thinking skills

On completion of the programme, successful students will be able to demonstrate the ability to:

C1. Critically evaluate and synthesise information from appropriate sources with intellectual flexibility to make independent judgements and apply to social work practice.

C2. Identify and define complex problems using flexible approaches/tools/methods to reach resolutions relevant to social work practice.

C3. Critically appraise and synthesise social work practice using reflective skills to review continuing development needs and review their progress towards becoming an effective and ethical social work practitioner.

C4. Critically analyse and evaluate key concepts and techniques and their application and relationships within and across social work and inter-professional practice.

## P. Practical, professional or subject-specific skills

On completion of the programme, successful students will be able to demonstrate the ability to:

P1. Act autonomously and ethically using anti-oppressive, anti-discriminatory approaches, taking initiative to achieve appropriate solutions in complex and unpredictable practice contexts.

P2. Critically analyse, evaluate and reflect upon their continuing professional development needs as a social work student, taking responsibility for their own learning.

P3. Demonstrate research-informed practice by applying evidence-based approaches to manage complexity in practice placements.

P4. Demonstrate critically reflexive judgements and autonomy in decision-making using ethical frameworks to manage social work dilemmas and conflicts.

P5. Critically evaluate and challenge inequality and discrimination in service delivery, and in the lives of carers and people who use services, demonstrating increasing commitment to anti-oppressive, anti-discriminatory practice and the ability to challenge social injustice.

P6. Apply the standards of professionalism as set out by Social Work England to uphold public confidence and trust in the social work profession.

## T. Transferable, key or personal skills

On completion of the programme, successful students will be able to demonstrate the ability to:

T1. Develop self-awareness, self-care and emotional resilience.

T2. Demonstrate employment potential and ability to manage themselves in terms of time, organisation, engagement, motivation, initiative, reliability, record keeping and professional relationships.

T3. Apply interpersonal skills effectively - including listening, influencing and negotiation - in normal circumstances and conflict resolution.

T4. Assess and reflect on academic, professional and personal goals; lifelong learning; and accept responsibility for their own continuing development.

#### Learning and teaching strategies

The modules are delivered through a range of strategies including: lectures, group work, seminars, individual tutorial support, personal study time, and provision of multi-media resources through the VLE. Lecturers will communicate the theoretical content of a module to students; however, throughout this delivery, students will be expected to relate theory to practice through practice-based observations and exercises. Students have the opportunity to learn inter-professionally through attendance on and participation in modules that are shared with other disciplines such as Counselling and Psychology, and Health and Social Welfare. The teaching will support students in reflective activity that considers theory in relation to current practice, leading to the beginning of reflection on - and in - practice. Students will be expected to undertake a wide range of personal reading from sources provided on the VLE, and through library-based research.

Integral to the teaching and learning strategy is the involvement of people who use services and carers who deliver a range of in class lectures, webinar seminars and online forums. They are also involved in role plays and contribute to the formative feedback of student performance throughout the programme. In addition, service users and carers participate in the quality assurance of the programme via attendance at meetings and planning events.

Teaching is supported via the VLE, MS Teams and Microsoft 365. The VLE gives students access to lecture notes and hand-outs and is the primary means of communication between staff and students. It is also a key tool for online collaboration between students helping them to engage in effective group work and peer-to-peer support. It can also be used for secure electronic submission of assessed work and for equally secure return of marked work and feedback.

In addition to theoretical learning, students undertake two different practice placements which are organised and planned in conjunction with the benchmark statements for practice learning in England. The Placement Learning Co-ordinator identifies and quality assures placements under a memorandum of co-operation with the Teaching Partnership and other regional stakeholders.

From the outset of the programme, students are supported to develop research skills by tutors and by the subject specialist librarian. At Levels 4 and 5, students extend their skills and confidence in research and become increasing independent and self-motivated. At Level 6, students benefit from an update on research skills which is increasingly focused on e-resources and subject specific material.

## Learning activities (KIS entry)

Course Year	HE4	HE5	HE6
Scheduled learning and teaching activities	30.0%	21.2%	22.5%
Guided independent study	70.0%	64.5%	77.5%
Placement	0.0%	14.3% + 70 days	100 days

#### Assessment strategy

The programme uses differentiated teaching and learning strategies to promote diversity in learning styles. Assessments include a range of tasks to promote criticality and enhance reflexive learning as a social work professional, such as:

- Essays
- Examination
- Presentations group and individual
- Group work
- Book Club
- Digital story
- Online forums and peer learning groups
- Communication skills workshops
- Recorded role plays
- Direct observations in practice
- Reflective journals
- Case studies
- Learning journals
- Research in Practice

Formative assessment opportunities provide a less pressurised opportunity for students to assess their own learning, and a chance to both give and receive peer feedback, developing critical, analytical and leadership skills, progressing toward personal and academic maturity. Formative feedback takes the form of written and/or verbal feedback, tutorials and personal targets, and peer feedback. These serve to develop academic skills such as referencing and study skills as well as areas such as self-appraisal and self-reflection. This helps students to reflect and revise their planning and preparation ready for their summative work.

Summative assessment measures student achievement of intended learning outcomes. Assignment tasks and assessment criteria are set out in module handbooks and are regularly discussed during teaching sessions and assessment workshops. Written and verbal feedback provided to students is designed to indicate the extent to which students have addressed the relevant learning outcomes in their assignment submission. Students are given clear guidance on assessment requirements and criteria in written form and through teaching sessions and formative assessment. They are helped through the levels of study to progress to more mature, analytical and academically critical styles.

## Assessment methods (KIS entry)

Course Year	HE4	HE5	HE6
Written exams	0%	14.3%	11.7%
Coursework	83.3%	46.4%	63.3%
Practical	16.7%	39.3%	25.0%

#### Assessment regulations

Assessment Regulations for Undergraduate/Postgraduate Taught Programmes apply to this programme.

Regulations can be found at:

https://www.bolton.ac.uk/student-policy-zone

## Grade bands and classifications

Degree

Grade	Mark
First class	70-100%
Upper Second Class	60-69%
Lower second Class	50-59%
Third Class	40-49%

#### **Role of external examiners**

External examiners are appointed for all programmes of study. They oversee the assessment process and their duties include: approving assessment tasks, viewing assessed samples of work with corresponding feedback/feed forward, reviewing assessment marks, attending assessment boards and reporting to the University on the assessment process.

## Support for student learning

Students interact with the curriculum through involvement in student-led seminars, presentations and discussions. The development of independent learning and leadership skills, including self-evaluation and conscious awareness of effective learning techniques is promoted through interactive teaching approaches such as personal tutorials, e-mail, VLE-based activities and the requirement to pursue independent research. In addition, the programme and the College have well-developed and successful learning support mechanisms as part of on-going commitment to widening participation. These include support for academic writing which is delivered by specialist in-house staff. In addition, the Social Work team has structured the programme to embed the following early support strategies for learning;

- Diagnostic testing at interview stages and disclosure of specific learning needs requiring reasonable adjustments.
- On entry at Level 4, diagnostic academic writing task to formulate a personal plan for learning using pastoral support.
- Tutor referral to in-house learner support teams to enable students to access support and to obtain a formal reasonable adjustment support plan.
- Improved preparation of students for placement by providing additional support seminars delivered by our Placement Learning Co-ordinator with support from the Teaching Partnership and modules Preparation for Professional Practice 1 and 2.
- Student support during the practice placements by skilled and trained practice educators who comply with practice educator professional standards of Social Work England.
- Tutors undertake two formal visits during the practice placements to prepare personal learning plans, monitor progress and review the quality of learning experiences. Tutors support the student and placement.

Throughout their studies, students have an allocated personal tutor who offers one-to-one pastoral tutorials to review personal targets for learning. In addition to this directed 'contact time', tutors are widely accessible both in person as well as online through the VLE forums/e-mail. Student representatives attend programme committee and practice partnership meetings providing the opportunity for the programme team to adapt and problem solve barriers to learning.

During induction, students are advised about confidentiality and the sharing of personal information as part of discussion about professional boundaries and behaviour. Students are informed that all information is confidential to the classroom setting as part of the process of learning. They are also advised that relevant life experience such as being a service user or carer can evoke powerful and critical learning experiences. Students are encouraged to use personal tutorials to prepare for exposure to in class material and plan strategies for emotional safety. Students are also advised about their right to keep information private from their peers and are signposted to relevant support services which are universally available.

The College also has well established supplementary support services to meet additional needs such as:

- Student counselling services via the Safeguarding/Well-being team.
- The Students' Union.
- Student services includes the provision of support for mental health wellbeing and student finances.
